Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Electric Lighting Next to the human need for food, shelter and clothing, comes the need for artificial light. The meeting of this requirement, upon a large scale, becomes an engineering proposition and electric lighting stands prime among various agencies used therefor, when illuminants are classified according to their effectiveness, adaptability, flexibility and efficiency. There are few engineering activities which have advanced more rapidly during the last few years than have the art and practice of electric lighting. Illuminants have been steadily improved and refined. New types of lamps have been developed giving better colors of light, more efficient light production, cheaper units and a greater range of sizes. Principles of illumination have been studied and applied in the better solution of lighting problems. Indirect lighting, semior complete, has introduced great possibilities into the handling of both small and large installations. The economic value of good lighting is better appreciated. Color is beginning to play an important part in lighting schemes. It is destined to become even more widely utilized. There are excellent books which satisfactorily cover certain portions of the field which is understood to be included by the term Electric Lighting. Generally speaking, however, they emphasize some one phase of the subject, to the partial exclusion of other equally worthy considerations. This limits their usefulness as text-books and it has been the aim of the author to meet the need in this particular by the production of a well-balanced presentation of fundamentals, with principles and practice appearing through the whole work. It is not thought necessary to make this treatise a voluminous one. Those users who desire more subject matter will find unlimited amounts...
