The mechanical equipment in buildings of this kind is more or less complex, depending upon their size and use, and may provide for the generation of power, lighting, elevator service, refrigeration, pumping, fire protection, air compression, vacuum cleaning, drying, water heating, cooking, sterilizing, etc., not to mention the special machinery used in various manufacturing processes. In some cases only a few of these requirements may be necessary, while in others, like the modern office building or hotel, practically all of those noted are called for. It has been the aim in the present volume to treat the various problems somewhat broadly and with special reference to...
