## Geology and Geography of a Portion of Lincoln County, Wyoming (Paperback)

---

By Alfred Reginald Schultz

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: .1,500 or 1,600 feet above the Snake, and a few hundred yards to the west a heavy underlying series of grayish sandstone outcrops, showing about the same direction and rate of inclination. The latter deposits afford obscure vegetable remains, which, together with their lithology, warrant their identification with the Laramie. If there be unconformity between these beds and the gray calcareous conglomerate, it is not apparent at this locality. It is the lower beds here described that should probably be referred to the Evanston. They may, however, be Frontier or Bear River. The Evanston formation in the Fall River basin reaches a maximum thickness of about 9,500 feet. The beds generally dip 15--45 E., but farther west, toward the older beds, they dip more steeply. The Evanston in this basin lies unconformably upon Weber quartzite and later Carboniferous, Triassic, and Jurassic beds, involving an unconformity of...
